## Power Platform Developer & M365 Administrator

Results-driven Power Platform Developer with 3 years of hands-on experience in designing, developing, and implementing customized solutions using Power Platform ecosystem. Also proficient as a Microsoft 365 Administrator, ensuring the smooth operation of communication and collaboration tools across the enterprise. A meticulous problem-solver with a keen eye for detail and dedicated to optimizing processes through creative and innovative approaches.

### Power Platform Developer & M365 Administrator<sup>o</sup> July 2020 – Present Prca Global Enterprises, Waterloo, ON

- Successfully conceptualized, developed, and implemented over five tailored Power Apps solutions for diverse departments including orchard management, distillery operations, construction, window production, and snow-removal & landscape services.
- Collaborating closely with each team, I identified their unique needs and pain points, translating them into intuitive and efficient applications.
- Through meticulous design and deployment, these solutions significantly streamlined processes, optimizing workflow efficiency, and fostering a more productive work environment across the board.
- Enriched application interfaces through responsive design methodologies, ensuring exceptional user experiences across a variety of devices and screen resolutions.
- Integrated Power Apps with SharePoint and OneDrive, enabling seamless document management and version control within the organization.
- Created and maintained automated workflows using Power Automate to streamline business processes and improve efficiency.
- Proficient in designing, deploying, and managing Microsoft 365 services, including Exchange Online, SharePoint Online, and Microsoft Teams.
- Managed user accounts and access permissions within Microsoft 365, including Azure Active Directory.
- Oversaw the management of licenses and the renewal of subscriptions for Microsoft 365 services and other software applications.
- Setup Virtual Machines for access control - providing our employees with secure remote access to efficiently manage tenants fobs and buzzers across multiple buildings. Our team can promptly respond to tenant requests, update access permissions, and configure security settings without physical on-site presence, saving valuable time and resources.
- Streamlined Onboarding Automation - simplifies the user onboarding process from start to finish. This efficient system eliminates manual intervention, reduces errors, and expedites the onboarding process, ensuring new employees have immediate access to essential resources and collaborative workspaces.
- Managed comprehensive mobile device management (MDM) and mobile application management (MAM) solutions for organizations. Adeptly configuring policies, profiles, and compliance settings to optimize device performance and data protection.
